-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.
2. The information disclosure statement filed 12/23/2003 & 9/5/2003 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.
3. It is unclear which reference "Case 9118 DE" German language 14 page document should be.

Drawings

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "132" has been used to designate both articulated shaft (paragraph 21, ln 1) and hydraulic motor (paragraph 22, ln 17). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures

appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

5. Claims 1, 5 is objected to because of the following informalities: "a sensor located" (cl. 1, ln 8) appears to be incomplete; "cutch" spelling error (cl. 5, ln 2). Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Clauss DE 19918552 A1 (cited by the applicant).

The claim 1 mainly recites a torque sensor & control system, similarly the prior art provides for a crop jam sensor (ref 102) which senses the drive torque of one of the rolls, shaft (ref 62), of the conveying element (conveyor ref 38), which then uses a

Art Unit: 3671

control arrangement (ref 100) in order to output signals to a cylinder to elevate the hold down arrangement or reverse the drive (also, see applicant's description of the prior art, paragraph 2); other elements: power source/engine (ref 65);

In re claims 3 & 4: forage harvester (ref 110) comprising: shear bar & cutter knife drum (ref 58, chopper drum ref 122), and a crop take up arrangement (ref 50).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Radomski (cited by applicant) is relevant since it teaches an acoustic monitor specifically for sounds created due to jamming, overloading for an agricultural machine (col. 1, ln 67);

other prior art cited by examiner: Missotten et al., Clauss, Bohman et al., Bohman.
